ADDRESSING HEALTH DISPARITIES *in the U.S.*

“Health disparities are preventable differences in the burden of disease, injury, violence, or opportunities to achieve optimal health that are experienced by socially disadvantaged populations.”

– Centers for Disease Control and Prevention

Health conditions that disproportionately affect minority communities include:

- Asthma
- Cancer
- Cardiovascular Disease
- Diabetes
- HIV/AIDS

“The National Library of Medicine provides health information resources that address the concerns of diverse communities and specific populations.”
